Subject: Input for Response to DRF 2270

The following information is provided as input for the hazardous waste and hazardous materials portions of DRF 2270:

1. Attachment 1 is a map of the Rocketdyne SSFL. The map breaks up the facility into areas I through IV. Area IV is the ETEC-DOE portion of the facility. The hazardous waste storage area (HWSA) is the primary shipping facility at SSFL for hazardous waste. All hazardous waste generated at SSFL including ETEC waste is sent to this facility where it awaits shipment to a Rockwell approved off-site treatment, storage, and disposal facility. The HWSA (highlighted on the map) is located in NASA Area II next to Bravo. Building 030 and 641 are the primary shipping points for outside hazardous material shipments (see map).

2. The following persons are responsible for the indicated phases of hazardous waste and hazardous materials health and safety, packaging and transportation at SSFL.

J. M. Sherman, D/543 Environmental Engineer	(818) 773-5323 (818) 773-5480 (fax)
J. Burton, D/483 Safety & Environment Health Specialist	(818) 586-6079 (818) 586-6144 (fax)
J. A. Kucinskas, D/014 Transportation Manager	(818) 710-5159 (818) 710-2752 (fax)

3. The following includes the types and annual volume of hazardous wastes shipped on/off-site.

Waste	Shipping Name/Hazard Class	Expected Vol. FY1991	Average Shipment Volume
Oil	Non RCRA hazardous waste, liquid (waste oil)	8,000 lbs	800 lbs
Oil and water	Non RCRA hazardous waste, liquid (water and oil)	2,000 lbs	200 lbs
